SIMILARITY: BELONGS TO THE FATTY ACID DESATURASE FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   PHOSPHOLIPIDS.

PATHWAY: Polyunsaturated fatty acid biosynthesis.

SUBCELLULAR LOCATION: Endoplasmic reticulum.

DOMAIN: THE HISTIDINE BOX DOMAINS MAY CONTAIN THE

AND/ OR BE INVOLVED IN METAL ION BINDING.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FUNCTION: ER (MICROSOMAL) OMEGA-3 FATTY ACID DESATURASE INTRODUCES THE THIRD DOUBLEBOND IN THE BIOSYNTHESIS OF 18:3 FATTY ACIDS, IMPORTANT CONSTITUENTS OF PLANT MEMBRANES.                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
